## PROFILE

AI-driven **Content Producer & Pipeline Architect** with a proven track record of commercial campaigns for Tier-1 markets (US / UK / EU). I design fully automated **"content factories"** and produce cinematic, viral short-form video — pairing advanced prompt engineering with end-to-end automation built in **Claude Code**. Scaled an organic audience to **120,000+ followers** and **50,000,000+ views** across platforms in just 6 months, with zero ad spend.

## WHAT I DO

### 01 Multi-Modal Prompt Engineering

Expert prompt design across text, image, video & sound — a formal method (camera → subject → scene → lighting) for cinematic results at scale.

### 03 Viral Short-Form

Reels, Shorts & TikTok engineered to travel — from high-converting ad clips to expressive visual stories with a real wow-effect.

### 05 AI Voice & Sound

Voice-over via AI synthesis with genuine intonation and acting delivery, plus music and audio beds tuned to the scene.

### 02 Concept, Script & Storyboard

Scripts, narrative structure, visual concepts, storyboards, action beats, imagery and atmosphere — built to hold attention.

### 04 Content Factories

End-to-end automated production pipelines that carry a concept all the way to finished, published content.

### 06 Edit, Post & Delivery

Final cut, color and export with professional post-production — brand- and art-directed, delivery-ready for every platform.

## SOFTWARE I BUILD

**Cantry** — my own AI film studio, designed, coded and shipped solo in **Claude Code** and now live at **cantry.ai**: a 17-step pipeline with agentic automation, a built-in AI Ad Studio, multi-user auth and a security-reviewed architecture. I don't just use AI tools — I build the software that runs them. Python · FastAPI · JavaScript · Claude Agent SDK · MCP · GEO.

## AI & TECH STACK

TEXT	Claude	Gemini
